

TMC Group

We are an international high-tech company, comprised of Employeneurs with more than 30 nationalities who provide services to customers all over the world. We excel in research, development and engineering including in the field of computer and data science of 80 employees.

EMPLOYENEURSHIP

TMC is a unique collection of self-starting, highly skilled and almost self-employed technical professionals. Our unparalleled Employeneurship model offers engineers from all backgrounds the comforts of employment and the opportunities of entrepreneurship. This makes for a challenging, stimulating environment that you are welcome to explore.

The term Employeneurship might sound unfamiliar. It's because we invented it. Not just as a word but as a way of working, a paradigm even. Basically Employeneurship is about thinking and acting like an entrepreneur, with the security of employment. But more than anything, it is a guarantee for continuous development and the opportunity to really be responsible for the direction of your career. Our Employeneurship model is based on 5 principles: a long-term working-relationship, individual profit sharing, business cells, YOUiversity and The Entrepreneurial Lab.

Our unique Employeneurship model facilitates your development in the broadest sense of the word. For starters, instead of sticking to one place you get to work at various companies. All the while TMC remains your home base with a smart coaching program. So while you hone your 'hard' technical expertise in a challenging series of projects, there is ample opportunity to work on 'soft' aspects like personal skills.

WORK AT TMC

Our Employeneurs can only give their all at their jobs, if our staff at TMC's offices give theirs. We take special pride in the way we look after our engineers, our esteemed partners and the opportunities we create together.

INTERNATIONAL

With offices in the Netherlands, Belgium, France, Spain and Italy we are every inch a pan-European organization. But our reach and outlook is even bigger than that, as our projects and customers are anywhere. From Madagascar mining sites to Chinese high tech manufacturers; our Employeneurs feel right at home.
